**1. *Statement of Purposes (Section 2 of EBR, page 150 of the Task Force Report)***

The Statement of Purposes influences the interpretation of the entire legislation. The draft bill lists a number of purposes for the bill, including the protection, conservation and, where reasonable, restoration of the environment, provision for sustainability of the environment, and protection of the right of present and future generations to a healthful environment.

My comments are:

**2. *Statement of Environmental Values (Sections 5-9, page 151)***

Each designated ministry must prepare a formal Statement of Environmental Values. The objective of this statement is to ensure that environmental considerations and the purposes of the Environmental Bill of Rights are integrated with the social, economic and scientific considerations already applied by each ministry when making decisions that affect the environment. There will be consultation with the public on the content of each designated ministry's statement at a later date.

**Do you have any comments about the requirement for ministries to develop statements of environmental values?**

☐ Yes

☐ No

My comments are:

**3. *Environmental Registry (Sections 10-21, pages 151-154)***

The government will establish an Environmental Registry. This Registry will facilitate public involvement directly in environmental decision-making and aid members of the public in scrutinizing how a ministry applies its Statement of Environmental Values to its decision-making. The Registry will provide notice of proposed policies, regulations and instruments that may have a significant effect on the environment.
